

The School of Computing and Informatics announces a new Masters Programme:

MSc in Information Technology Enabled Services (MSc ITES)

The MSc (ITES) has been launched to produce trained mid-level manpower for ITES sector. In particular, it will train supervisors and managers of call agents, front office and back office staff in existing and potential ITES firms; corporate organizations, Government departments and agencies that want to outsource; new micro, small and medium enterprises that want to attract ITES outsourcing work; and off-shore companies involved Business process outsourcing (BPO). The target group for this course will be graduates who are already involved in the ITES sector or who would like to develop a career in this sector. This programme is therefore guided by the need to lay a firm human resource foundation for both local and international business opportunities made possible by new and emerging ICT technologies.

Applications are invited for the September 2016 intake.

Minimum Requirements

Holders of a bachelor's degree in any discipline of the University of Nairobi or an equivalent qualification recognized by the University of Nairobi Senate

Details are available on the School Website here:
